Details

The EUROSPRING ES-80H electric water heater provides efficient and dependable hot water for your home. Designed to adapt to various room types, the ES-80H offers a horizontal installation option, making it a versatile choice for different spaces. Built with high-quality, durable materials, this 80-liter glass-lined water heater ensures long-lasting performance and reliability.

High-Quality Construction: The ES-80H features a high-thickness steel tank tested at 16 bar, providing exceptional strength and resistance to pressure. This robust construction ensures durability and a long lifespan.

Italian-Made Safety Features: Equipped with an original Italian thermostat featuring a built-in safety device, this water heater prioritizes safety and precise temperature control. The pressure safety valve is tested at 8 bar for added peace of mind.

Energy Efficiency: The ES-80H is designed for temperature regulation efficiency and energy savings. Its extra-thick polyurethane insulation minimizes heat loss, reducing energy consumption and lowering your utility bills.

Sleek and Modern Design: With its exclusive sleek design and white finish, the ES-80H seamlessly integrates into any home decor. The external temperature regulation allows for easy adjustment and personalized comfort.

Easy Installation and Maintenance: The wall-hung design and 2-bolts flange make installation straightforward. The durable construction and reliable components minimize the need for frequent maintenance.

Warranty: Enjoy peace of mind with a 5-year guarantee, ensuring long-term satisfaction and protection against manufacturing defects.
