#### Specifications

<b>Brand</b>	Eurospring
<b>Product Code</b>	SP-50

#### Details

The SP-50 Eurospring 4"WC P-Trap (80mm) is a crucial component for any bathroom plumbing system, designed to prevent sewer gases from entering your home. This high-quality P-trap from Eurospring ensures efficient waste drainage and long-lasting performance. Its sturdy construction and precise engineering guarantee a secure and leak-proof connection.

**Reliable Protection:** The primary function of this P-trap is to create a water seal that blocks harmful and unpleasant sewer gases from rising through the drainpipe. This ensures a healthier and more comfortable environment in your bathroom.

**Durable Construction:** Made from robust materials, the SP-50 Eurospring P-Trap is built to withstand the rigors of daily use. Its durable design minimizes the risk of cracks, leaks, and other forms of damage, ensuring a long service life.

**Optimal Size:** With a 4-inch WC size (80mm), this P-trap is compatible with standard toilet drain connections. Its precisely engineered dimensions ensure a proper fit and optimal drainage performance.

**Eurospring Quality:** As a product of Eurospring, the SP-50 P-Trap is backed by a reputation for quality and reliability. Eurospring is a trusted name in plumbing supplies, known for its commitment to excellence and customer satisfaction.

**Easy Installation:** Designed for ease of installation, the SP-50 P-Trap can be quickly and securely connected to your existing plumbing system. While professional installation is always recommended, its user-friendly design simplifies the process.

Upgrade your bathroom plumbing with the SP-50 Eurospring 4"WC P-Trap (80mm) for reliable performance and peace of mind. Its durable construction, optimal size, and gas-blocking capabilities make it an essential component for any modern bathroom.
